

# Robotic Coffee Machine

## Product Specifications

Product Name	Robot Robotics Solution for Coffee Bar
Dimensions	1500 x 1350 x 2000 mm
Footprint	2.5 m <sup>2</sup>
Net Weight	500 kg
Input Voltage	AC 220V/50Hz
Rated Power	5.68kW
Capacity	100 ~ 150 drinks
Production Time	45 ~ 90 s/drinks
Payment Method	Scan Code (with 10.1-inch touch screen)

Add-On & Upgrade Options Available

USA/San Francisco: +1 510 456 0556  
 Canada/ Vancouver: +1 236 833 5255

Innovative Robotic Solutions for Business

## AI-Powered Robotic Coffee Machine

This robotic coffee machine is a fully automated coffee machine featuring a six-axis collaborative robot. It brews high-quality fragrant coffee in <1 minute with minimum supervision, ensuring high quality and consistency. Capable of operating 24/7, it tackles challenges like cost efficiency, limited operating space, and inconsistent quality found in traditional coffee shops. It offers a new business paradigm for the development of retail automation.

**Quick Production:** Robotic solution improves production efficiency by 30%. Coffee can be made in less than 1 minute with consistent high quality.

**Customizable Options (Hot / Cold):** Caters 50+ unique drinks with sugar levels and temperature adjustment based on individual preferences.

**Auto-Cleaning & Sustainable Design:** Automatic deep cleaning and high-temperature sterilization steps, ensuring comprehensive cleaning and achieving higher safety standards.

**24/7 Operation & Cost Effective:** 24-hour automated operation, and consumes only 5 kW power, substantially lower energy and operating cost, making it environmentally friendly.

**Flexible Deployment:** All-in-one and space-saving design with only 2.5 m<sup>2</sup> footprint. It is easily movable and deployable.
